101 Performance Projects for Your Pickup and SUV Rick Shandley "Pickup" and "sports utility vehicle" seem like quaint names for these workhorses. More and more, they're what people tune up, trick out, and take on the road (or off). This book aims to help drivers make the most of their machines. With 101 projects running the gamut from installing light bars and brush guards to gearing up for hard-core horsepower and high-performance feats, this book will show truck and SUV owners of all stripes how to personalize their rides. 101 Performance Projects for Your Pickup and SUV offers easy-to-follow, clearly illustrated how-to information on everything from appearance modifications to more extensive upgrades, with plenty of instructions for the many bolt-on solutions that are available in the marketplace. Planning, tools, expenses, pros, and cons: it's all here. The author walks owners through the nuts and bolts of lowering and lift kits, running boards and in-car entertainment systems, winches, wheels and tires, and the full range of installations and accessories that will take a truck or an SUV to the next level.

The Offshoring of Engineering National Academy of Engineering 2008-08-14 The engineering enterprise is a pillar of U.S. national and homeland security, economic vitality, and innovation. But many engineering tasks can now be performed anywhere in the world. The emergence of "offshoring"- the transfer of work from the United States to affiliated and unaffiliated entities abroad - has raised concerns about the impacts of globalization. The Offshoring of Engineering helps to answer many questions about the scope, composition, and motivation for offshoring and considers the implications for the future of U.S. engineering practice, labor markets, education, and research. This book examines trends and impacts from a broad perspective and in six specific industries - software, semiconductors, personal computer manufacturing, construction engineering and services, automobiles, and pharmaceuticals. The Offshoring of Engineering will be of great interest to engineers, engineering professors and deans, and policy makers, as well as people outside the engineering community who are concerned with sustaining and strengthening U.S. engineering capabilities in support of homeland security, economic vitality, and innovation.
