Hoot Carl Hiaasen 2019-06-13 Hilarious, touching and thought-provoking, *Hoot* is a modern classic, now celebrating its fifteenth anniversary. Winner of the Newbery Honor award and a New York Times bestseller, Carl Hiaasen's first novel celebrates the natural world with his trademark wit and warmth. Roy Eberhardt never wanted to move to Florida. In his opinion, Disney World is an armpit. Roy's family moves around a lot so he's used to the new-kid drill - he's also used to bullies like Dana Matherson. And anyway, it's because of Dana that Roy gets to see the mysterious running boy who runs away from the school bus and who has no books, no backpack and, most bizarrely, no shoes. Sensing a mystery, Roy starts to trail the mystery runner - a chase that will introduce him to many weird Floridian creatures: potty-trained alligators, cute burrowing owls, a fake-fart champion, a shoeless eco-warrior, a sinister pancake PR man, new friends and some snakes with sparkly tails. As the plot thickens, Roy and his friends realise it's up to them to save the endangered owls from the evil Mother Paula's pancake company who are planning to build a new restaurant on their home . . .

The Genius of Birds Jennifer Ackerman 2016-04-21 Birds are astonishingly intelligent creatures. In fact, according to revolutionary new research, some birds rival primates and even humans in their remarkable forms of intelligence. Like humans, many birds have enormous brains

relative to their size. Although small, bird brains are packed with neurons that allow them to punch well above their weight. In *The Genius of Birds*, acclaimed author Jennifer Ackerman explores the newly discovered brilliance of birds and how it came about. As she travels around the world to the most cutting-edge frontiers of research - the distant laboratories of Barbados and New Caledonia, the great tit communities of the United Kingdom and the bowerbird habitats of Australia, the ravaged mid-Atlantic coast after Hurricane Sandy and the warming mountains of central Virginia and the western states - Ackerman not only tells the story of the recently uncovered genius of birds but also delves deeply into the latest findings about the bird brain itself that are revolutionizing our view of what it means to be intelligent. Consider, as Ackerman does, the Clark's nutcracker, a bird that can hide as many as 30,000 seeds over dozens of square miles and remember where it put them several months later; the mockingbirds and thrashers, species that can store 200 to 2,000 different songs in a brain a thousand times smaller than ours; the well-known pigeon, which knows where it's going, even thousands of miles from familiar territory; and the New Caledonian crow, an impressive bird that makes its own tools. But beyond highlighting how birds use their unique genius in technical ways, Ackerman points out the impressive social smarts of birds. They deceive and manipulate. They eavesdrop. They display a strong sense of fairness. They give gifts. They play keep-away and tug-of-war. They tease. They share. They cultivate social

networks. They vie for status. They kiss to console one another. They teach their young. They blackmail their parents. They alert one another to danger. They summon witnesses to the death of a peer. They may even grieve. This elegant scientific investigation and travelogue weaves personal anecdotes with fascinating science. Ackerman delivers an extraordinary story that will both give readers a new appreciation for the exceptional talents of birds and let them discover what birds can reveal about our changing world.

Her husband is a workaholic, her teenage kids have their own lives, her senile mother-in-law needs constant care, and she's always a step behind on her endless to-do list. James is well traveled and well read, and he makes Patricia feel things she hasn't felt in years. But when children on the other side of town go missing, their deaths written off by local police, Patricia has reason to believe James Harris is more of a Bundy than a Brad Pitt. The real problem? Mary's Monster Lita Judge 2018-01-30 "Both timely and terrifying." —Gregory Macguire, New York Times–bestselling author of *Wicked Pairing* free verse with over three hundred pages of black-and-white watercolor illustrations, *Mary's Monster* is a unique and stunning biography of Mary Shelley, the pregnant teenage runaway who became one of the greatest authors of all time. Legend is correct that Mary Shelley began penning *Frankenstein* in answer to a dare to write a ghost story. What most people don't know, however, is that the seeds of her novel had been planted long before that night. By age nineteen, she had been disowned by her family, was living in scandal with a married man, and had lost her baby daughter just days after her birth. Mary poured her grief, pain, and passion into the powerful book still revered two hundred years later, and in *Mary's Monster*, author/illustrator Lita Judge has poured her own passion into a gorgeous book that pays tribute to the life of this incredible author. How to Live Sarah Bakewell 2011-04-05 How to get on well with people, how to deal with violence, how to adjust to losing someone you love? How to live? This question obsessed Renaissance nobleman Michel Eyquem de Montaigne (1533-92), who wrote free-roaming explorations of his thought and experience, unlike anything written before. Into these essays he put whatever was in his head: his tastes in wine and food, his childhood memories, the way his dog's ears twitched when it was dreaming, events in the appalling civil wars raging around him. The Essays was an instant bestseller, and over four hundred years later, readers still come to him in search of companionship, wisdom and entertainment - and in search of themselves. This first full biography of Montaigne in English for nearly fifty years relates the story of his life by way of the questions he posed and the answers he explored.

Language at the Speed of Sight Mark Seidenberg 2017-01-03 In this "important and alarming" book, see why so many American students are falling behind in their reading skills while others around the world excel (New York Times). In 2011, when an international survey reported that students in Shanghai dramatically outperformed American students in reading, math, and science, President Obama declared it a "Sputnik moment": a wake-up call about the dismal state of American education. Little has changed, however, since then: over half of our children still read at a basic level and few become highly proficient. Many American children and adults are not functionally literate, with serious consequences. Poor readers are more likely to drop out of the educational system and as adults are unable to fully participate in the workforce, adequately manage their own health care, or advance their children's education. In *Language at the Speed of Sight*, internationally renowned cognitive scientist Mark Seidenberg reveals the underexplored science of reading, which spans cognitive science, neurobiology, and linguistics. As Seidenberg shows, the disconnect between science and education is a major factor in America's chronic underachievement. How we teach reading places many children at risk of failure, discriminates against poorer kids, and discourages even those who could have become more successful readers. Children aren't taught basic print skills because educators cling to the disproved theory that good readers guess the words in texts, a strategy that encourages skimming instead of close reading. Interventions for children with reading disabilities are delayed because parents are mistakenly told their kids will catch up if they work harder. Learning to read is more difficult for children who speak a minority dialect in the home, but that is not reflected in classroom practices. By building on science's insights, we can improve how our children read, and take real steps toward solving the inequality that illiteracy breeds. Both an expert look at our relationship with the written word and a rousing call to action, *Language at*

the Speed of Sight is essential for parents, educators, policy makers, and all others who want to understand why so many fail to read, and how to change that.

Lights, Camera, Disaster Erin Dionne 2018-03-27

Hester Greene loves making movies. With her camera in hand, she can focus, make decisions, and have the control she lacks in life, where her executive function disorder (think extreme ADHD plus anxiety) sabotages her every move. But middle school is not a movie, and if her last-ditch attempt to save her language-arts grade--and her chance to pass eighth grade, period--doesn't work, Hess could lose her friends, her year, even her camera. It will take more than a cool training montage to get her life together, but by thinking outside the frame, she just might craft a whole new ending. Written partially in script form, with STOP/PAUSE/PLAY/REWIND moments throughout, this laugh-out-loud story will speak to any budding filmmaker, or unintentional troublemaker, in every act of their lives.

Skink No Surrender Carl Hiaasen 2014-09-11 A New York Times bestseller and laugh out loud thriller from Carl Hiaasen about a missing cousin, a half-crazy governor, giant gators and justice -- swamp justice, that is. Typical Malley - to avoid being shipped off to boarding school, she takes off with some guy she met online. Poor Richard - he knows his cousin's in trouble before she does. Wild Skink - he's a ragged, one-eyed ex-governor of Florida, and enough of a renegade to think he can track Malley down. With Richard riding shotgun, the unlikely pair scour the state, undaunted by blinding storms, crazed pigs, flying bullets and giant gators. Carl Hiaasen first introduced readers to Skink more than 25 years ago in DOUBLE WHAMMY, and he quickly became Hiaasen's most iconic and beloved character, appearing in six novels to date. Both teens and adults will be thrilled to catch sight of the elusive 'governor' as he pursues his own unique brand of swamp justice. With Skink at the wheel, the search for a missing girl is both nail-bitingly tense and laugh-out-loud funny.

House Arrest K.A. Holt 2015-10-06 Timothy is on probation. It's a strange word—something that happens to other kids, to delinquents, not to kids like him. And yet, he is under house arrest for the next year. He must check in weekly with a probation officer and a therapist, and keep a journal for an entire year. And mostly, he has to stay out of trouble. But when he must take drastic measures to help his struggling family, staying out of trouble proves more difficult than Timothy ever thought it would be. By turns touching and funny, and always original, *House Arrest* is a middlegrade novel in verse about one boy's path to redemption as he navigates life with a sick brother, a grieving mother, and one tough probation officer.
