**Motorized Obsessions** Paul R. Josephson  
2007-08-22 From dirt bikes and jet skis to weed  
wackers and snowblowers, machines powered by  
small gas engines have become a  
permanent—and loud—fixture in American culture.  
But fifty years of high-speed fun and pristine  
lawns have not come without cost. In the first  
comprehensive history of the small-bore engine  
and the technology it powers, Paul R. Josephson

explores the political, environmental, and public  
health issues surrounding one of America's most  
dangerous pastimes. Each chapter tells the story  
of an ecosystem within the United States and the  
devices that wreak havoc on it—personal  
watercraft (PWCs) on inland lakes and rivers; all-  
terrain vehicles (ATVs) in deserts and forests;  
lawn mowers and leaf blowers in suburbia. In  
addition to environmental impacts, Josephson  
discusses the development and promotion of  
these technologies, the legal and regulatory  
efforts made to improve their safety and  
environmental soundness, and the role of owners'

clubs in encouraging responsible operation.

Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

**The Crash of Comair 5191** George Cramoisi 2009-09-01 On August 27, 2006, Comair Flight 5191, a Bombardier CL-600-2B19, crashed during takeoff from the wrong runway of Blue Grass

Airport, Lexington, Kentucky, killing 49 of the 50 people aboard. From the beginning everything went wrong. First the captain and first officer boarded the wrong airplane, only after starting the auxiliary power unit they found out they were in the wrong aircraft. Taxiing to the takeoff position the captain and first officer were so deeply engaged in a private conversation that they did not realize they took the wrong runway. The air traffic controller did not notice anything.
