*Child Health Supervision* George Washington Univ., Washington, DC. Center for Health Policy Research 1995 This report presents findings of a George Washington University Center for Health Policy Research (CHPR) multi-year project to conduct analytical studies on the financing, delivery, and cost effectiveness of child health supervision services. Against a backdrop of decline in private sector coverage for children, a growing number of children living in poverty, and major health care reform efforts, the goal of the CHPR project was to identify and examine health systems problems in three major areas: access and financing, organization and delivery, and cost and effectiveness. The resulting studies are presented as follows: (1) "An Overview of Health Insurance Coverage and Access to Child Health Supervision Services" (Michele R. Solloway); (2) "Private Health Insurance Coverage of Preventive Benefits for Children" (Margaret A. McManus and Karen Hertz); (3) "A 20-Year Retrospective of Child Health Supervision" (Jerome A. **The Cambridge Handbook of the Changing Nature of Work** Brian J. Hoffman 2020-04-23 This

handbook provides an overview of the research on the changing nature of work and workers by marshalling interdisciplinary research to summarize the empirical evidence and provide documentation of what has actually changed. Connections are explored between the changing nature of work and macro-level trends in technological change, income inequality, global labor markets, labor unions, organizational forms, and skill polarization, among others. This edited volume also reviews evidence for changes in workers, including generational change (or lack thereof), that has accumulated across domains. Based on documented changes in work and worker behavior, the handbook derives implications for a range of management functions, such as selection, performance management, leadership, workplace ethics, and employee well-being. This evaluation of the extent of changes and their impact gives guidance on what best practices should be put in place to harness these developments to achieve success.

Whose Welfare? Gwendolyn Mink 2018-09-05

Over the past few decades, the goal of welfare reform has been to move poor families off of welfare, not necessarily out of poverty. By that criterion, the Personal Responsibility and Work Opportunity Act of 1996 has been successful indeed: throughout the nation, millions have vanished from the welfare rolls. But what has been the cost of this "success" to the women and children who were the overwhelming majority of recipients? Here a group of distinguished feminist scholars examines the causes and the impact of recent changes in welfare policy. Some of the authors trace the politics of welfare from the 1960s, emphasizing how attitudes toward "motherwork" and "working mothers" have evolved in the backlash against poor women's motherhood. Several other authors consider the effects of the new welfare policy on employment and wages, on the lives of noncitizen immigrants, on poor women's ability to escape domestic violence, and on their reproductive and parental rights. A third set of authors explores dependency and caregiving, along with the role of feminist thinking on these issues in the politics of welfare. *Whose Welfare?* concludes with a historical analysis of activism among poor women. By illuminating that legacy, the volume challenges readers to build progressive agendas from the demands and actions of poor and working-class women.
