Asia's Next Giant Alice H. Amsden 1989-09-07 South Korea has been quietly growing into a major economic force that is even challenging some Japanese industries. This timely book examines South Korean growth as an example of "late industrialization," a process in which a nation's industries learn from earlier innovator nations, rather than innovate themselves. Discussing state intervention, shop floor management, and big business groups, Amsden explores the reasons for South Korea's phenomenal growth, paying special attention to the principle of reciprocity in which the government imposes strict performance standards on those industries and companies that it aids. She thereby shows how South Korea, Japan, and Taiwan were able to grow faster than other emerging nations such as Brazil, Turkey, India, and Mexico. With its new insights, Asia's Next Giant is essential reading for anyone concerned with global competition and the world economy.

Grandfather Knows Best Jerry Zezima 2016-01-04 What guy takes his granddaughter to the aquarium and spouts fish puns all day? Who accompanies her to a children's recreation center and almost faints in the bouncy house? And which grandpa goes to the White House Easter Egg Roll so he can introduce his precious pumpkin not to the president but to Peppa Pig? Jerry Zezima, who also gives grandfatherly advice to Prince Charles, peddles his granddaughter's preschool fundraiser, introduces her to the neighborhood ice cream man, and does lots of other fun stuff, both with and without his adorable princess, which may explain why she is more mature than he is. Trends and Issues in Action Learning Practice Yonjoo Cho 2013-01-04 Dynamic workplaces demand continuous employee learning and development to keep up with current and effective organizational contexts. Action learning is among the most widely used and effective interventions for leadership and organizational development around the world. This timely book provides readers with the first comprehensive account of the history and evolution of action learning in South Korea, informing practitioners and researchers on the best practices of action learning and how they can be modified to fit different cultural contexts. Unlike most literature on action learning, which focuses on implementation strategies in Western contexts, Trends and Issues in Action Learning Practice details a uniquely Korean perspective. South Korean companies engage actively in action learning programs as a tool for leadership and organization development, helping them adapt to global markets and a rapidly changing management environment. Key success factors from twenty years of South Korean action learning, presented through representative case studies and research conducted by both academics and professionals, highlight the importance of culture in action learning and provides readers with insights and advice for future international research and practice.

Made in Korea Richard M. Steers 2013-08-21 American business folklore is awash with the adventures of successful entrepreneurs. Still, most of these stories are about Americans, neglecting important and courageous entrepreneurs from other countries. Made in Korea recounts the story of how Chung Ju Yung rose from poverty to build one of the world's largest and most successful building empires - Hyundai - through a combination of creative thinking, tenacity, timing, political skills, and a business strategy that few competitors ever understood. Chung entered the shipbuilding business with no experience and went on to create the world's largest shipyard. He began making automobiles when foreign experts unanimously predicted he would fail, and he started a global construction company that has built some of today's greatest architectural wonders. He even convinced the International Olympic Committee to select South Korea over Japan as the site for the highly successful 1988 Olympics. Unlike most CEO's of major firms, Chung has always preferred the company of his workers to that of the global executive elite. Hard work, creativity and a capacity to never give up - this is the essence of Chung's life. In each of his ventures, he exhibited a sheer determination to succeed, regardless of the obstacles, and he worked tirelessly to instil this drive in all of his employees. Even today, in the midst of Korea's worst economic crisis in over four decades, Chung's company is busy implementing plans to emerge as an even stronger contender in the world economy. Illustrated with 32 pages of colour photographs not previously seen in the West, including photos of Chung's recent historic visit to North Korea in 1998, Made in Korea takes stock of Chung's entire life, highlighting both his contributions to society and the lessons his work can teach to aspiring entrepreneurs.
