*Business Process Management* Mathias Weske 2019-06-22

Business process management is usually treated from two different perspectives: business administration and computer science. While business administration professionals tend to consider information technology as a subordinate aspect in business process management for experts to handle, by contrast computer science professionals often consider business goals and organizational regulations as terms that do not deserve much thought but require the appropriate level of abstraction. Matthias Weske argues that all communities involved need to have a common understanding of the different aspects of business process management. To this end, he details the complete business process lifecycle from the modeling phase to process enactment and improvement, taking into account all different stakeholders involved. After starting with a presentation of general foundations and abstraction models, he explains concepts like process orchestrations and choreographies, as well as process properties and data dependencies. Finally, he presents both traditional and advanced business process management architectures, covering, for example, workflow management systems, service-oriented architectures, and data-driven

approaches. In addition, he shows how standards like WfMC, SOAP, WSDL, and BPEL fit into the picture. This textbook is ideally suited for classes on business process management, information systems architecture, and workflow management. This 3rd edition contains a new chapter on business decision modelling, covering the Decision Model and Notation (DMN) standard; the chapter on process choreographies has been streamlined, and numerous clarifications have been fetched throughout the book. The accompanying website [www.bpm-book.com](http://www.bpm-book.com) contains further information and additional teaching material.

**Managing Organizations for Sport and Physical Activity** Packianathan Chelladurai 2014-04-15 *Managing Organizations for Sport and Physical Activity*, fourth edition, presents a clear and concise treatment of managing organizations in sport and physical activity. The four functions of management—planning, organizing, leading, and evaluating—provide a general framework that represents the simplest and best approach for introducing readers to the intricacies of management. For each management function, Chelladurai presents relevant theories and their practical applications, citing those theoretical models that are most appropriate to the unique aspects of the sports industry. He uses the open systems perspective, placing organizations in the context of their environment and emphasizing the manager's role in adapting and reacting to changes in that environment. To apply theory to sport management practices, Chelladurai provides numerous examples from the fields of physical activity and sport, including professional sports, intercollegiate athletics, health and sports clubs, and recreation/fitness programs. New to the Fourth Edition A chapter on service quality, which describes the notion of quality in sport management services—from the local fitness center to the pro sport arena. It also discusses the measurement of service quality and the gaps in translating customer expectations into the desired service. A new feature providing "An Expert's View," which offers additional perspectives on relevant topics contributed by scholars who research and publish in a specific area. New sidebars on current topics relevant
