Trotter 2020-04-15 In *More Than Medicine*, LaTonya J. Trotter chronicles the everyday work of a group of nurse practitioners (NPs) working on the front lines of the American health care crisis as they cared for four hundred African American older adults

living with poor health and limited means. Trotter describes how these NPs practiced an inclusive form of care work that addressed medical, social, and organizational problems that often accompany poverty. In solving this expanded terrain of problems from inside the clinic, these NPs were not only solving a broader set of concerns for their patients; they became a professional solution for managing "difficult people" for both their employer and the state. Through *More Than Medicine*, we discover that the problems found in the NP's exam room are as much a product of our nation's disinvestment in social problems as of physician scarcity or rising costs.

Patients at Risk Niran Al-Agba
2020-11-01 *Patients at Risk: The Rise of the Nurse Practitioner and Physician Assistant in Healthcare* exposes a vast conspiracy of political maneuvering and corporate greed that has led to the replacement

of qualified medical professionals by lesser trained practitioners. As corporations seek to save money and government agencies aim to increase constituent access, minimum qualifications for the guardians of our nation's healthcare continue to decline—with deadly consequences. This is a story that has not yet been told, and one that has dangerous repercussions for all Americans. With the rate of nurse practitioner and physician assistant graduates exceeding that of physician graduates, if you are not already being treated by a non-physician, chances are, you soon will be. While advocates for these professions insist that research shows that they can provide the same care as physicians, patients do not know the whole truth: that there are no

credible scientific studies to support the safety and efficacy of non-physicians practicing without physician supervision. Written by two physicians who have witnessed the decline of medical expertise over the last twenty years, this data-driven book interweaves heart-rending true patient stories with hard data, showing how patients have been sacrificed for profit by the substitution of non-physician practitioners. Adding a dimension neglected by modern healthcare critiques such as *An American Sickness*, this book provides a roadmap for patients to protect themselves from medical harm. WORDS OF PRAISE and REVIEWS Al-Agba and Bernard tell a frightening story that insiders know all too well. As mega corporations push for efficiency and

tout consumer focused retail services, American healthcare is being dumbed down to the point of no return. It's a story that many media outlets are missing and one that puts you and your family's health at real risk. --John Irvine, Deductible Media Laced with actual patient cases, the book's data and patterns of large corporations replacing physicians with non-physician practitioners, despite the vast difference in training is enlightening and astounding. The authors' extensively researched book methodically lays out the problems of our changing medical care landscape and solutions to ensure quality care. --Marilyn M. Singleton, MD, JD A masterful job of bringing to light a rapidly growing issue of what should be great concern to all of us: the proliferation of

non-physician practitioners that work predominantly inside algorithms rather than applying years of training, clinical knowledge, and experience. Instead of a patient-first mentality, we are increasingly met with the sad statement of Profits Over Patients, echoed by hospitals and health insurance companies. -- John M. Chamberlain, MHA, LFACHE, Board Chairman, Citizen Health A must read for patients attempting to navigate today's healthcare marketplace. --Brian Wilhelmi MD, JD, FASA

Secrets From The World's Most Productive Nurse Practitioner Jessica

Reeves Mph, Msn 2021-04-15 A track record of closing visits the same day (97-100% of the time), rarely running late, and leaving on time every day earned me the nickname of The World's Most Productive* Nurse Practitioner. Learn my secrets for staying on track at work, maintaining YOUR ideal work-life harmony, the questions to ask BEFORE you accept an offer that will let you know whether your potential new workplace views (and values) time the same way you do, and so much more. All the things that you DON'T learn in school are waiting for you

in this book. Buy it for yourself if you are about to graduate; give it as a gift for a new NP; pick it up and read it before you accept another job offer that could leave you burnt out and questioning whether leaving the floor as an RN was really the right choice (it was!). Cheaper than board reviews, and healthier than a cup of coffee or a bottle of wine, this is pretty much the BEST \$13.95 you could spend to prepare yourself for practice in all the ways that school didn't. And it's an easy read, with a sense of humor - what's the last book you read that you could say that about? I'll wait...

NP Notes Ruth McCaffrey 2009 A Daviss Notes book, NP Notes provides nurse practitioner students and clinicians easy access to the information most commonly needed in clinical practice.

It will be organized in tabs that focus on the areas for which nurse practitioners are responsible, mainly screening, assessing, diagnosing and treating medical conditions and coding for optimal revenue.

The Future of Nursing Institute of Medicine 2011-02-08 The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and

unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses'

training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

The nurse practitioner profession is one of the fastest-growing medical professions in the United States. With the passing of the Affordable Care Act, millions of Americans have become insured, with NPs filling the gap and providing affordable access to care. NPs work in all 50 states plus the District of Columbia, and they have complete autonomy in many states. Nurse practitioners see patients of all ages and in a wide variety of settings, write prescriptions, and order labs and tests, all while providing excellent patient care. The Ultimate Nurse Practitioner Guidebook aims to help anyone interested in a career as a nurse practitioner

determine whether it is the right path for them, and will also help current NP students successfully complete their programs. This book is

a must-read for those who are interested in attending nurse practitioner school, current nurse practitioner students, and even practicing NPs.
