[Advanced Antenna Systems for 5G Network Deployments](#) Henrik Asplund 2020-06-24 Advanced Antenna Systems for 5G Network Deployments: Bridging the Gap between Theory and Practice provides a comprehensive understanding of the field of advanced antenna systems (AAS) and how they can be deployed in 5G networks. The book gives a thorough understanding of the basic technology components, the state-of-the-art multi-antenna solutions, what support 3GPP has standardized together with the reasoning, AAS performance in real networks, and how AAS can be used to enhance network deployments. Explains how AAS features impact network performance and how AAS can be effectively used in a 5G network, based on either NR and/or LTE Shows what AAS configurations and features to use in different network deployment scenarios, focusing on mobile broadband, but also including fixed wireless access Presents the latest developments in multi-antenna technologies, including Beamforming, MIMO and cell shaping, along with the potential of different technologies in a commercial network context Provides a deep understanding of the differences between mid-band and mm-Wave solutions

**5G Second Phase Explained** Jyrki T. J. Penttinen 2021-06-14 A one-stop reference that offers an accessible guide to an understanding of the enhanced core technologies of 5G 5G Second Phase Explained - The 3GPP Release 16 Enhancements offers an authoritative and essential guide to the new functionalities of the Release 16 that complement the first phase of the 5G. From the author of 5G Explained comes the next step resource that includes detailed descriptions that provide a clear understanding to the full version of the 5G technologies and their impacts on the Phase 1 networks. The author a noted expert on the topic not only reviews the most up-to-date functionalities of the Release 16 but includes information on the forthcoming Release 17 as well as material on future developments. The book explores the highly unique aspects of the Release 16, which can help technical personnel efforts to deliver essential information in a practical way. The two books, 5G Explained and 5G Second Phase Explained, offer a comprehensive understanding of 5G. This important guide: Offers a summary of the newest and key features of 5G Presents a one-stop reference for an understanding of the core technologies of 5G Contains a new book that expands on the author's 5G Explained Puts the focus on security and deployment aspects of 5G enhancements Written for technical personnel of network operators, network element and user device manufacturers, 5G Second Phase Explained offers guide to an understanding of network deployment and device designing of 5G technologies.

*White Paper on Human Rights in North Korea 2015* Do Kyung-ok 2015-09-24 The 2015 edition of the White Paper on Human Rights in North Korea marks the 20th year of the series since its first publication in 1996. This White Paper is based on in-depth interviews with 221 of the 1,396 North Koreans who escaped to South Korea in 2014. These samples were selected with their demographic characteristics and social backgrounds taken into account. Below are the key highlights of the survey: In its national report for the Universal Periodic Review submitted to the United Nations (UN) Human Rights Council on January 30, 2014, North Korea explained that death penalty is applied to extremely restricted cases. In reality, however, North Korea has an extensive list of crimes punishable by the death penalty, defined not just by the Criminal Law but also by its Addendum; the death penalty may also be imposed by promulgations, instructions and other alternative formats. North Korean defectors, who have witnessed the death penalty carried out in public, have provided testimony that it has actually been given for a wide range of crimes. Of

special note is that over the last few years, the number of people put to death for watching/distributing South Korean video recordings or smuggling/trafficking narcotics is on a remarkable rise. This was widely observed in our 2014 survey, too. Human rights violations in ordinary prison camps (kyohwaso), labor training camps (rodongdanryundae), holding centers (jipkyulso), detention centers, political prison camps (kwanliso), and other detention facilities are still known to be serious. Inhumane treatment including torture and beatings are part of the daily routine; nutrition, medical care, and hygiene are also very poor. In our 2014 survey, however, some interviewees suggested that the human rights conditions in ordinary prison camps (kyohwaso) were improving somewhat. North Korean defector XXX, who was held for a long time at the Jongori kyohwaso, where a massive number of violent incidents and human rights violations reportedly took place, explained that beatings at the kyohwaso was on the decrease. North Korean defector XXX, who had been detained at the Jongori kyohwaso until recently, said that strenuous effort was being made to bring fatal incidents under control as the reality of the human rights infringements at the kyohwaso were known to the outside world through former inmates. Meanwhile, the 2014 survey results include testimonies on those released from political prison camps (kwanliso) in 2012 and 2013 —after Kim Jong-un took over as the new leader of North Korea. Witnesses explained that their release was “based on Kim Jong-un’s policy that those who have one percent of a conscience are given a second chance despite 99 percent of their faults”; and that “these people were released as Kim Jong-un, upon taking office, told those whose crimes were motivated by personal grievance, as opposed to criticism of the state, should be freed, which is within the context of his politics of law.” Similar cases can be found in North Korea’s On-site Open Trials System, too. Testimonies from North Korean defectors show that, when On-site Open Trials were conducted for a large number of people held for the same charge, some of them are executed immediately in public as “examples” while others are found innocent and released, allegedly due to Kim Jong-un’s consideration or policy. While unleashing a reign of terror against the power elites, the young leader seems to be seeking to present himself to ordinary citizens as a leader who loves the people. Nonetheless, the very fact that these measures are possible shows his policies and instructions have supra-legal authority in North Korea. A typical infringement on freedom of residence, the practice of forced deportation is still found to be widespread. North Korean defector XXX testified that in 2013, during his on-site instructions in Musan, Kim Jong-un ordered transformation of the city boundaries into an exemplary area. This led to the forced deportation of more than 600 households living within 300 meters of the city boundaries. Such massive involuntary relocation was enforced primarily upon family members of illegal border crossers or those with criminal records (such as illegal use of a mobile phone). A number of testimonies also suggested that forced deportation has been on the increase since mid-2013 in Samjiyon County, within which is the hometown of Kim Jong-il. In particular, those whose parents are from rural areas, former detainees at ordinary prison camps (kyohwaso) and their family members, and illegal border crossers are first to be relocated. According to the 2014 survey results, little progress has been made in improving North Koreans’ rights to food and health. When it comes to the right to food, the total volume of food available has increased since 2010, but North Korea’s discriminatory distribution policies has led to continued discrepancy among ordinary citizens in their access to food. Collection of excessive amounts of produce from farm workers, in particular, has undermined their right to food on a continuous basis. This seems partly attributable to the assignment of unrealistically high production quota and the falsification of

distribution documents. Excluded from the Public Distribution System (PDS), marginalized members of North Korean society tap into money offered by loan sharks to deal with the scarcity, ending up suffering even more. In the 2014 survey, however, a large number of interviewees said the public distribution supply has temporarily improved since 2012 as North Korean authorities released military provisions. As for the right to health, the uneven distribution of resources as a result of economic hardship and military-first politics has destroyed the medical system as a whole. The absolute lack of medicine and basic medical equipment has continued, while some interviewees pointed out in the 2014 survey that an increasing amount of medicine was being provided by Jungsung Pharmaceuticals. Meanwhile, as the North's free treatment system is not working properly, patients in need of surgery often end up paying for the related costs for themselves. The military ranks are also seeing their right to health deteriorating: Some interviewees stated that the military was also short on medicine, and not just civil society. The community doctor system and other mechanisms of preventive medicine propagandized by the North Korean authorities are not functioning properly. Community doctors are currently incapable of treating patients and can only issue medical certificates; they are known to work primarily on vaccinations (such as preventive injections against epidemics). A large number of interviewees in the 2014 survey said that vaccination was being offered. Vaccination seems to be improving efforts to prevent disease. Areas receiving aid from the UN and other international actors also enjoy relatively better medical treatment. Despite many constraints and the resulting shortcomings, we hope that this White Paper will draw more attention at home and abroad to the issue of human rights in North Korea while contributing to domestic and international discussion and action on improving the situation.

*Big Data at Work* Thomas Davenport 2014-02-04 Go ahead, be skeptical about big data. The author was—at first. When the term “big data” first came on the scene, bestselling author Tom Davenport (Competing on Analytics, Analytics at Work) thought it was just another example of technology hype. But his research in the years that followed changed his mind. Now, in clear, conversational language, Davenport explains what big data means—and why everyone in business needs to know about it. Big Data at Work covers all the bases: what big data means from a technical, consumer, and management perspective; what its opportunities and costs are; where it can have real business impact; and which aspects of this hot topic have been oversold. This book will help you understand:

- Why big data is important to you and your organization
- What technology you need to manage it
- How big data could change your job, your company, and your industry
- How to hire, rent, or develop the kinds of people who make big data work
- The key success factors in implementing any big data project
- How big data is leading to a new approach to managing analytics

With dozens of company examples, including UPS, GE, Amazon, United Healthcare, Citigroup, and many others, this book will help you seize all opportunities—from improving decisions, products, and services to strengthening customer relationships. It will show you how to put big data to work in your own organization so that you too can harness the power of this ever-evolving new resource.

*Implementing the Transparency Agenda* Great Britain: Parliament: House of Commons: Committee of Public Accounts 2012-08 Whilst progress towards the Government's objectives for transparency is recognised there are areas where further work needs to be done. It does not help government to meet the objectives of the transparency agenda when large quantities of raw data are released without ensuring that the data are fit for purpose. Some data are very difficult to interpret, and some is not being presented on a consistent basis, for example in local government. Poor or incomplete data hinders the ability of users to exercise effective choice and undermines the ability of service deliverers and policy makers to focus on improving quality. The Government has not yet developed a full understanding of costs and benefits of making information transparent, and so decisions on what data to make available and in what form are not yet guided by value for money considerations. The Cabinet Office says the Open Data Institute will establish a fuller evidence base on the economic and public service benefits of open data. The push for release of more data has also thrown up new challenges which departments need to meet, facilitated by strong leadership from the Cabinet Office. These include questions on how to sustain interest in data after the initial launch (for example crime maps), how to ensure sufficient disclosure of information by private firms delivering government contracts, vigilance over protecting personal privacy, and how the benefits of data disclosure can be realised by those without internet access

Those valuable lessons paid dividends in growing up. Peggy Miller fell in love with Richard best friend. His adopted sister became worried when Tony failed to report from his business trip. Richard went out tracing Tony steps. His first search, dead end. His second search, show promise. His third search, he discovered his friend alive but, where! Nick, long time friend of Peggy, interfered with the rescues. He wanted her himself. Marrying her would unite two rich family together.

*Giving white paper* Great Britain: Cabinet Office 2011-05-23 British people give more than £10 billion to charities, and volunteers work tirelessly for many organisations. But the giving of both time and money has flat-lined and some in the voluntary sector warn of decline. This white paper aims to make it easier and more compelling for people to give time and money to causes they support. The Government will be investing over £40 million in volunteering and social action over the next two years. And £80 million investment in Community First will encourage social action in neighbourhoods with significant deprivation and low social capital. The Social Action Fund and Challenge Prizes will support models that make giving easier; the Local Infrastructure Fund will provide additional money to help deliver more effective support for charities and community groups. New ways to give money will include ATM giving and "Round Pound" schemes to give small amounts when paying by card. Investment will be provided for the new Philanthropy UK website and for the Do-it volunteering database. Community organisers and business connectors will galvanise social action in communities. Criminal Records Bureau checks will be reduced to common-sense levels. Inheritance tax will be reduced to 36% for those who leave 10% or more of their estate to charity. New social norms will be encouraged: Ministers will lead by example, giving a day a year to a good cause; a philanthropy committee will review candidates for honours; core funding and match funding for schools-based programmes. Changes to Gift Aid are planned.

**Natural environment white paper** Great Britain: Parliament: House of Commons: Environment, Food and Rural Affairs Committee 2012-07-17 The Environment, Food and Rural Affairs Committee express concern that, more than one year on from publication of the natural environment white paper, "The Natural Choice: securing the value of nature" (Cm. 8082, ISBN 9780101808224), Defra has failed to set out clear plans to ensure that government decision-making fully values the services nature provides. All government policy should fully value natural capital. Government Ministers must also: publish an action plan with a timetable to deliver each of the White Paper's 92 commitments; give planners and developers guidance on how the National Planning Policy Framework can be used to protect Nature Improvement Areas; fully assess the benefits and costs of environmental regulation, to prevent a perception that environmental protection

imposes a drag on the UK economy; publish the Government's response to advice from the Natural Capital Committee. The report also concludes that: biodiversity offsetting can deliver positive impacts on the natural environment; the target to end all peat use by 2030 shows a lamentable lack of ambition and a review of progress must be brought forward to 2014; Defra must set a target to increase public engagement with nature, since local authorities, NGOs and charities can only secure funding for environmental projects when they can demonstrate measurable success; the Department for Health and the Department for Education must define measurements which demonstrate how greater public engagement with nature delivers gains in public health and educational attainment; the entire coastal path around England should be in place within 10 years.

*Data Science for COVID-19 Volume 1* Utku Kose 2021-05-20 Data Science for COVID-19 presents leading-edge research on data science techniques for the detection, mitigation, treatment and elimination of COVID-19. Sections provide an introduction to data science for COVID-19 research, considering past and future pandemics, as well as related Coronavirus variations. Other chapters cover a wide range of Data Science applications concerning COVID-19 research, including Image Analysis and Data Processing, Geoprocessing and tracking, Predictive Systems, Design Cognition, mobile technology, and telemedicine solutions. The book then covers Artificial Intelligence-based solutions, innovative treatment methods, and public safety. Finally, readers will learn about applications of Big Data and new data models for mitigation. Provides a leading-edge survey of Data Science techniques and methods for research, mitigation and treatment of the COVID-19 virus Integrates various Data Science techniques to provide a resource for COVID-19 researchers and clinicians around the world, including both positive and negative research findings Provides insights into innovative data-oriented modeling and predictive techniques from COVID-19 researchers Includes real-world feedback and user experiences from physicians and medical staff from around the world on the effectiveness of applied Data Science solutions

**DFID's performance in 2008-09 and the 2009 White Paper** Great Britain: Parliament: House of Commons: International Development Committee 2010-03-11 DFID is right to focus more resources on fragile states if global poverty reduction goals are to be met. However, this report highlights a number of concerns about DFID's capacity to meet this and other new policy directions set out in the 2009 White Paper (Cm. 7656, ISBN 9780101765626), based on analysis of the Department's performance in 2008-09 (the Department's annual report 2008-09 published as HC 867-I,II, ISBN 9780102962154). Climate change, another key White Paper focus area, threatens progress on poverty reduction and will hit the poorest people first and hardest. The outcome of the Copenhagen Conference in December 2009 was disappointing and real progress needs to be made before the next conference at the end of this year. The White Paper also indicates that DFID will channel more funding through multilateral organisations including the EU, the UN and the World Bank. This offers the prospect of more coordinated delivery of aid, but only if these bodies increase their effectiveness and their poverty focus. The report also argues for speedier reform of the governance of the international financial institutions. The recession has had a significant impact on developing countries. It is estimated that an additional 90 million people will be affected by poverty as a combined result of the global food, financial and fuel crises over the last few years. Donors, including the UK, have responded and have sought to identify specific needs in developing countries, though many donors are failing to meet the aid commitments they have already made.

**Commission for Equality and Human Rights: the Government's White Paper** Joint Committee On Human Rights 2004 This report responds to the white paper "Fairness for all: a new Commission for Equality and Human Rights" (Cm. 6185, ISBN 0101618522, issued 12 May 2004), which proposed a new

single body with responsibility for promoting equality throughout society, building on the strengths of existing Commissions (the Commission for Racial Equality, the Disability Rights Commission and the Equal Opportunities Commission). There is broad agreement between the white paper's proposals and the Committee's own proposals (11th report, HLP 78 / HCP 536 session 2003-04, ISBN 010400452, issued 5 May 2004). The areas of divergence include the following: the precise nature of the general duty to be placed upon the CEHR in relation to the promotion and protection of human rights; the details of the power of the CEHR to conduct "general inquiries"; the case for giving the Commission power to seek judicial review of the policies, actions and omissions of public authorities; and the institutional and funding arrangements to secure the independence and accountability of the new body.

**The water white paper** Great Britain: Parliament: House of Commons: Environment, Food and Rural Affairs Committee 2012-07-05 The Committee heard persuasive evidence about the environmental damage caused by over-abstraction. The reform of abstraction licenses must be brought forward as the Government's current plans - to reform the abstraction regime by the mid-to-late 2020s - will not take effect rapidly enough given that our rivers are already running dry. Defra must also work with Ofwat and the Environment Agency to tackle urgently those abstractions which are already causing severe damage to our rivers. It is "extremely disappointing" that the White Paper fails to set a target to increase levels of water metering. The report also highlights how bad debt in the water sector adds around £15 to each household's water bill every year. Defra must implement existing legal provisions rapidly to tackle this problem. The Committee also examines proposals to increase competition in the sector. They conclude that Defra should set a clear target date for opening a competitive retail market for water, and should take account of lessons that can be learned from Scotland. The Committee believes that the White Paper's proposals will fail to deliver a well-functioning retail market and suggests how to remedy this. The Government also needs to take action to encourage the development of Sustainable Drainage Systems (SuDS), which can reduce the risk of flooding, and to implement the relevant outstanding provisions of the Flood and Water Management Act 2010. It is "deeply worrying" that the Government had not yet reached an agreement with insurers about providing cover for homes in areas of flood risk

These innovations include immersive human-centric communication, sensing, localization, and imaging, connected machine learning and networked AI, Industry 4.0 and beyond with connected intelligence, smart cities and life, and the satellite mega-constellation for 3D full-Earth wireless coverage. Also covered are new air-interface and networking technologies, integrated sensing and communications, and integrated terrestrial and non-terrestrial networks. In addition, novel network architectures to enable network AI, user centric networks, native trustworthiness are discussed. Essential reading for researchers in academia and industry working on B5G wireless communications.

Open Data White Paper Great Britain. Cabinet Office 2012-06-28 This White Paper sets out clearly how the UK will continue to unlock and seize the benefits of data sharing in the future in a responsible way. Firstly by ensuring equality in access to data; secondly in building greater trust in public data; and thirdly by ensuring that public services are more personalised and efficient by being smarter with the data public bodies hold. The UK is currently co-chairing the Open Government Partnership of 55 governments whose theme is 'Transparency drives prosperity' with the belief that opening up data will empower citizens, foster innovation and reform public services. It is also, therefore, about how others participate. About businesses and organisations becoming more transparent themselves and pushing data into the public domain and individuals taking that data and using it to make better decisions or press for different types of services.

The Fourth Industrial Revolution Klaus Schwab 2017-01-03 The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history.

Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In *The Fourth Industrial Revolution*, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.

**Competing on Analytics** Thomas H. Davenport 2007-03-06 You have more information at hand about your business environment than ever before. But are you using it to “out-think” your rivals? If not, you may be missing out on a potent competitive tool. In *Competing on Analytics: The New Science of Winning*, Thomas H. Davenport and Jeanne G. Harris argue that the frontier for using data to make decisions has shifted dramatically. Certain high-performing enterprises are now building their competitive strategies around data-driven insights that in turn generate impressive business results. Their secret weapon? Analytics: sophisticated quantitative and statistical analysis and predictive modeling. Exemplars of analytics are using new tools to identify their most profitable customers and offer them the right price, to accelerate product innovation, to optimize supply chains, and to identify the true drivers of financial performance. A wealth of examples—from organizations as diverse as Amazon, Barclay’s, Capital One, Harrah’s, Procter & Gamble, Wachovia, and the Boston Red Sox—illuminate how to leverage the power of analytics.

**5G for the Connected World** Devaki Chandramouli 2019-02-13 *Comprehensive Handbook Demystifies 5G for Technical and Business Professionals in Mobile Telecommunication Fields* Much is being said regarding the possibilities and capabilities of the emerging 5G technology, as the evolution towards 5G promises to transform entire industries and many aspects of our society. *5G for the Connected World* offers a comprehensive technical overview that telecommunication professionals need to understand and take advantage of these developments. The book offers a wide-ranging coverage of the technical aspects of 5G (with special consideration of the 3GPP Release 15 content), how it enables new services and how it differs from LTE. This includes information on potential use cases, aspects of radio and core networks, spectrum considerations and the services primarily driving 5G development and deployment. The text also looks at 5G in relation to the Internet of Things, machine to machine communication and technical enablers such as LTE-M, NB-IoT and EC-GSM. Additional chapters discuss new business models for telecommunication service providers and vertical industries as a result of introducing 5G and strategies for staying ahead of the curve. Other topics include: Key features of the new 5G radio such as descriptions of new waveforms, massive MIMO and beamforming technologies as well as spectrum considerations for 5G radio regarding all possible bands Drivers, motivations and overview of the new 5G system - especially RAN architecture and technology enablers (e.g. service-based architecture, compute-storage split and network exposure) for native cloud deployments Mobile edge computing, Non-3GPP access, Fixed-Mobile Convergence Detailed overview of mobility management, session management and Quality of Service frameworks 5G security

vision and architecture Ultra-low latency and high reliability use cases and enablers, challenges and requirements (e.g. remote control, industrial automation, public safety and V2X communication) An outline of the requirements and challenges imposed by massive numbers of devices connected to cellular networks While some familiarity with the basics of 3GPP networks is helpful, *5G for the Connected World* is intended for a variety of readers. It will prove a useful guide for telecommunication professionals, standardization experts, network operators, application developers and business analysts (or students working in these fields) as well as infrastructure and device vendors looking to develop and integrate 5G into their products, and to deploy 5G radio and core networks.

**Conceptual Structures for Discovering Knowledge** Heather D. Pfeiffer 2013-01-06 This book constitutes the proceedings of the 20th International Conference on Conceptual Structures, ICCS 2013, held in Mumbai, India, in January 2013. The 22 full papers presented were carefully reviewed and selected from 43 submissions for inclusion in the book. The volume also contains 3 invited talks. ICCS focuses on the useful representation and analysis of conceptual knowledge with research and business applications. It advances the theory and practice in connecting the user's conceptual approach to problem solving with the formal structures that computer applications need to bring their productivity to bear. Conceptual structures (CS) represent a family of approaches that builds on the successes of artificial intelligence, business intelligence, computational linguistics, conceptual modeling, information and Web technologies, user modeling, and knowledge management.

**The White Paper** Goldlyn Ugonna Ozowuba 2012-10-29 *The White Paper* is a compelling tale of neglect and deprivation. The play revolves around a group of secondary school teachers and their families. Through the playwright, the characters are able to voice their pain, their joy, and their hope. Interwoven in the main plot are other important themes like corruption, indiscipline, poverty, marital discord, betrayal, and love. The white paper is Ozowuba Goldlyn's fourth book. Her debut *Beyond Imagination* won the award for women writing in 2009.
