**Room Acoustics** Heinrich Kuttruff 2016-10-03  
Well established as a classic reference and specialised textbook, since its first publication in 1973, Heinrich Kuttruff's Room Acoustics combines detailed coverage with a state of art presentation of the theory and practice of sound behaviour in closed spaces. This sixth edition presents several additional new sections, for instance on the reflection of a spherical wave from a wall, on finite element methods for sound field calculation and on virtual reality, as well as giving an overhaul of the standard material. Particular emphasis is given to the properties and calculation of reverberation, the most obvious acoustical feature of a room. And further key topics include the various mechanisms of sound absorption and their practical application as well as scattering by wall irregularities including pseudo-stochastic structures. Extensive space is given to of psychoacoustic insights and the quality criteria derived from them, along with new procedures for the sensory assessment of concert hall acoustics. As in earlier editions, one full and updated chapter is devoted to the design and performance of electroacoustic systems which nowadays is not just a method for sound amplification but offers many possibilities for correcting acoustic deficiencies and modifying a hall's natural acoustics.

**More Brilliant Than the Sun** Kodwo Eshun 2018-10-09 The classic work on the music of

Afrofuturism, from jazz to jungle More Brilliant than the Sun: Adventures in Sonic Fiction is one of the most extraordinary books on music ever written. Part manifesto for a militant posthumanism, part journey through the unacknowledged traditions of diasporic science fiction, this book finds the future shock in Afrofuturist sounds from jazz, dub and techno to funk, hip hop and jungle. By exploring the music of such musical luminaries as Sun Ra, Alice Coltrane, Lee Perry, Dr Octagon, Parliament and Underground Resistance, theorist and artist Kodwo Eshun mobilises their concepts in order to open the possibilities of sonic fiction: the hitherto unexplored intersections between science fiction and organised sound. Situated between electronic music history, media theory, science fiction and Afrodiasporic studies, More Brilliant than the Sun is one of the key works to stake a claim for the generative possibilities of Afrofuturism. Much referenced since its original publication in 1998, but long unavailable, this new edition includes an introduction by Kodwo Eshun as well as texts by filmmaker John Akomfrah and producer Steve Goodman aka kode9.

Morris Award Winner, The Serpent King is the critically acclaimed, much-beloved story of three teens who find themselves--and each other--while on the cusp of graduating from high school with hopes of leaving their small-town behind. Perfect for fans of John Green's Turtles All the Way Down. "Move over, John Green; Zentner is coming for you." —The New York Public Library "Will fill the infinite space that was left in your chest after you finished The Perks of Being a Wallflower." —BookRiot.com Dill isn't the most popular kid at his rural Tennessee high school. Fortunately, his two fellow misfits and best friends, Travis and Lydia, have his back. But as they begin their senior year, Dill feels the coils of his future tightening around him. **Mastery** Robert Greene 2012-11-19 'Machiavelli has a new rival, and Sun-tzu had better watch his back' - New York Times Around the globe, people are facing the same problem - that we are born as individuals but are forced to conform to the rules of society if we want to succeed. To see our uniqueness expressed in our achievements, we must first learn the rules - and then how to change them completely. Charles Darwin began as an underachieving schoolboy, Leonardo da Vinci as an illegitimate outcast. The secret of their eventual greatness lies in a 'rigorous apprenticeship': by paying close and careful attention, they learnt to master the 'hidden codes' which determine ultimate success or failure. Then, they rewrote the rules as a reflection of their own individuality, blasting previous patterns of achievement open from within. Told through Robert Greene's signature blend of historical anecdote and psychological insight and drawing on interviews with world leaders, Mastery builds on the strategies outlined in The 48 Laws of Power to provide a practical guide to greatness - and how to start living by your own rules. From the internationally bestselling author of The 48 Laws of Power, The Art Of Seduction, and The 33 Strategies Of War.

**Blackstar Theory** Leah Kardos 2021-12-16  
Blackstar Theory takes a close look at David Bowie's ambitious last works: his surprise 'comeback' project The Next Day (2013), the off-Broadway musical Lazarus (2015) and the album that preceded the artist's death in 2016 by two days, Blackstar. The book explores the swirl of themes that orbit and entangle these projects from a starting point in musical analysis and features new interviews with key collaborators from the period: producer Tony Visconti, graphic designer Jonathan Barnbrook, musical director Henry Hey, saxophonist Donny McCaslin and assistant sound engineer Erin Tonkon. These works tackle the biggest of ideas: identity, creativity, chaos, transience and immortality. They enact a process of individuation for the Bowie meta-persona and invite us to consider what happens when a star dies. In our universe, dying stars do not disappear - they transform into new stellar objects, remnants and gravitational forces. The radical potential of the Blackstar is demonstrated in the rock star supernova that creates a singularity resulting in cultural iconicity. It is how a man approaching his own

death can create art that illuminates the immortal potential of all matter in the known universe.
