**Requirements for the Retention of Laboratory Records and Diagnostic**

**Material** Department of Health and Ageing Staff 2009 "This is the fifth edition of the NPAAC requirements for the retention of laboratory records and diagnostic materials. This edition is substantially the same as the fourth edition, with only minor amendments to the fourth edition. Since the publication of the third edition, there have been significant developments in Australian laboratory practice. For example, all pathology laboratories are now required to maintain a formal quality system, and must be accredited to ISO 15189 (AS4633). In addition, new privacy principles and legislation have come into effect, legislation has clarified the status of retained human parts and tissues, and the Human Genetics Advisory Commission (HGAC) has been formed. To address these developments, NPAAC has completely revised the requirements for retention, and has

adopted guiding principles to create a uniform and integrated approach to retention requirements."--Introduction, p. 1.
