The Archive Thief Lisa Moses Leff 2015-06-09 In the aftermath of the Holocaust, Jewish historian Zosa Szajkowski gathered up tens of thousands of documents from Nazi buildings in Berlin, and later, public archives and private synagogues in France, and moved them all, illicitly, to New York. In *The Archive Thief*, Lisa Moses Leff reconstructs Szajkowski's story in all its ambiguity. Born into poverty in Russian Poland, Szajkowski first made his name in Paris as a communist journalist. In the late 1930s, as he saw the threats to Jewish safety rising in Europe, he broke with the party and committed himself to defending his people in a new way, as a scholar associated with the YIVO Institute for Jewish Research. Following a harrowing 1941 escape from France and U.S. army service, Szajkowski struggled to remake his life as a historian, eking out a living as a YIVO archivist in postwar New York. His scholarly output was tremendous nevertheless; he published scores of studies on French Jewish history that opened up new ways of thinking about Jewish emancipation, modernization, and the rise of modern antisemitism. But underlying Szajkowski's scholarly accomplishments were the documents he stole, moved, and eventually sold to American and Israeli research libraries, where they remain today. Part detective story, part analysis of the construction of history, *The Archive Thief* offers a window into the debates over the rightful ownership of contested Jewish archives and the powerful ideological, economic, and psychological forces that have made Jewish

scholars care so deeply about preserving the remnants of their past.

Crescas: Light of the Lord (Or Hashem) Roslyn Weiss 2018-11-10 This book is the first complete English translation of Hasdai Crescas's *Light of the Lord*, widely acknowledged as a seminal work of medieval Jewish philosophy, one second in importance only to Maimonides' *Guide of the Perplexed*. In it Crescas takes on not only Maimonides but, through him, Aristotle, and challenges views of physics and metaphysics that had become entrenched in medieval thought. Once the Aristotelian underpinnings of medieval thought are dislodged, Crescas introduces alternative physical views and reinstates the classical Jewish God as a God of love and benefaction rather than a self-intellecting intellect. The end for humankind then is to become attached in love to the God of love through devoted service.

Operational Excellence and Respect Levent Turk 2021-01-11 What if I told you *Operational Excellence* is not about learning and applying, but unlearning and abandoning? One-size-fits-all strategies, management, and production systems try to impose their behavioral codes. The results could only be perfect if employees were machines that worked according to preloaded software. However, people act by their feelings. They feel depending on how they think and think according to

their desires and beliefs. Systems often ignore humans and try to drive their behavior. But to realize the true potential, we must understand the human condition and utilize the non-productive energy that cannot be visualized and eliminated by systems like Lean and 6-Sigma. If systems cannot measure the problems they create, they cannot reach excellence. Developing a Toyota like culture takes decades. Still, there is a way. You don't need to learn anything new for Operational Excellence. It is all about avoiding mistakes. Most managers have similar goals, make similar mistakes, fail, and learn the same things. With the unique combination of Western Philosophy, psychology, and neuroscience, this book decodes the secrets of Operational Excellence based on the experience of a former Toyota General Manager who learned TPS in Japan and successfully implemented it in multiple automotive OEMs. Instead of telling what to do to achieve probable success, I decrypt what not to do to avoid guaranteed failures. If the only source of knowledge is experience as Einstein put it, this book can save you many years of trial and error and common failures. Reviews "5S was once 4S, we added sustain to cope with cultural differences surrounding discipline. The 8 wastes were once the 7 wastes, we added the 8th to cope with cultural differences surrounding respect for humanity. These are both excellent examples of how we often detract from wisdom by adding to it. Thinking we can improve things we don't yet understand has led people down the wrong path for time immemorial. Early in this book, Levent Turk grabs this error in thinking and nails it to the wall with this line; Human potential is not something we need to unleash, but rather, something we frequently block... the rest of the book just gets

better from that point forward. The author's firsthand training in Toyota, Japan, senior leadership positions in Toyota over 15 years, and 12 years' experience implementing TPS into non-Toyota production environments provides this book with solid foundations. If this were the book we'd inherited in the 90s, maybe we would now be surrounded by leaders who realise a high-performance culture is more to do with their own beliefs in what good looks like and the conditions they create for human brains to survive in ... and not about training tools and tracking KPIs. What others take a whole book to say, Levent Turk captures in a single paragraph or sentence. This is a book of a 1000 books. If you are in a leadership position and want to create a high-performance culture, do yourself a favour. Hang onto every word, ponder every page, digest, understand, reflect. You will not find a better way to spend your time." David Bovis "Levent Turk has written a remarkable book, one that is truly unique in the genre of TPS and Lean. More than a reflection of a lifetime in business, it is a synthesis of ideas woven into a rich tapestry of valuable insights that readers will enjoy reflecting on and putting into action." Professor Bob Emiliani **DISCIPLINE WITH RESPECT in Caring Relationships** Geoffrey W. Sutton 2020-09-24 DISCIPLINE WITH RESPECT is a challenge to look beyond the day-to-day activities of raising children to consider what children must learn to become mature responsible young adults. It is only when considering adulthood that all the encouragements, coaching, rules, guidance, and re-directions make sense. Discipline is education. To accomplish our task, we must be well equipped and committed to an educational program that will help children meet their life goals. But there's more to child discipline than techniques.

Discipline with respect means developing a respectful, loving relationship with children.

Contemporary European Perspectives on the Ethics of End of Life Care Nathan Emmerich 2020-05-12 This book examines the ethics of end of life care, focusing on the kinds of decisions that are commonly made in clinical practice. Specific attention is paid to the intensification of treatment for terminal symptoms, particularly pain relief, and the withdrawal and withholding of care, particularly life-saving or life-

prolonging medical care. The book is structured into three sections. The first section contains essays examining end of life care from the perspective of moral theory and theology. The second sets out various conceptual terms and distinctions relevant to decision-making at the end of life. The third section contains chapters that focus on substantive ethical issues. This format not only provides for a comprehensive analysis of the ethical issues that arise in the context of end of life care but allows readers to effectively trace the philosophical, theological and conceptual underpinnings that inform their specific interests. This work will be of interest to scholars working in the area as well as clinicians, specialists and healthcare professionals who encounter these issues in the course of their practice.

Euthanasia and Law in the Netherlands John Griffiths 1998 The Netherlands is the only country in the world in which euthanasia, under narrow-defined circumstances, is legally permissible. Considerable attention has been paid over a number of years to the problem of regulating it and information has been systematically collected concerning actual practice. Therefore the Dutch experience is of interest not only to the Dutch, but to anyone who is considering whether or not to make euthanasia a legal practice. This book is written for a reader without specific knowledge of law. The central focus of the book is on Dutch law pertaining to euthanasia, but it also considers the moral and legal principles that have played a role in the Dutch debate, the available evidence bearing on actual practice and on the effectiveness of legal control. It ends with some reflections on the problem of the 'slippery slope' and the question whether the Dutch experience is 'exportable'. It includes translations of the relevant

legislation (including proposed reforms) and of three leading cases.

The Oxford Handbook of Ethical Theory David Copp
2005-12-22 The Oxford Handbook of Ethical Theory is a major new reference work in ethical theory consisting of commissioned essays by leading moral philosophers. Ethical theories have always been of central importance to philosophy, and remain so; ethical theory is one of the most active areas of philosophical research and teaching today. Courses in ethics are taught in colleges and universities at all levels, and ethical theory is the organizing principle for all of them. The Handbook is divided into two parts, mirroring the field. The first part treats meta-ethical theory, which deals with theoretical questions about morality and moral judgment, including questions about moral language, the epistemology of moral belief, the truth aptness of moral claims, and so forth. The second part addresses normative theory, which deals with general moral issues, including the plausibility of various ethical theories and abstract principles of behavior. Examples of such theories are consequentialism and virtue theory. As with other Oxford Handbooks, the twenty-five contributors cover the field in a comprehensive and highly accessible way, while achieving three goals: exposition of central

ideas, criticism of other approaches, and putting forth a distinct viewpoint.

Commercial Law and Commercial Practice Sarah Worthington 2003-12-19 This edited collection brings together leading scholars and practitioners from various jurisdictions with essays and commentaries co-ordinated around the theme of alignments and misalignments between commercial law and commercial practice. The purpose of the book is to prompt a more critical and constructive reassessment of current commercial law and its practices, and to instigate a more fruitful dialogue between academics, judges, law reformers and practitioners. The result is a series of provocative and challenging essays addressing an enormous range of problems that are of intimate concern to commercial practice. Some essays focus on broad themes, such as globalization and trust. Others address more specific issues, such as contract interpretation or constraining modern management. Yet another group targets special problems, such as dematerialisation or super-priority, in order to assess the success of commercial law in meeting commercial demands. The depth and breadth of

issues addressed is a credit to the authors. Taken as a whole, the volume makes some pointed suggestions for

improving the practices and processes, and indeed the future progress, of commercial law.
